R_x Eliminate

DESCRIPTION: This exciting new product is composed of specially bred 3 phase enzyme/bacterial cultures that actually attack and break down the uric acid molecules. It does its job by digesting the source, just the way nature does it. Works fast, in minutes rather than days or weeks, with zero environmental impact. The 3 phase cultures consist of aerobic, anaerobic, and facultative bacteria. This product has over 200 billion enzyme producing bacteria per gallon.

ADVANTAGES:

- Cultures that grow with or without air
- Long shelf life
- Non-Polluting
- Non-Acid
- Non-Caustic
- Will not corrode drainpipes
- Non-Toxic
- Eliminates foul odors

DIRECTIONS: Remove soiled matter from surface. Clean surface is necessary to remove stains. Spray the area and allow to remain and dry on the surface. The enzyme's natural paste color will not stain carpets, floors or walls

Use in and around urinals, toilets, drains, sinks, and garbage pails. Very effective in eliminating pet odors on carpets.

SAFETY: Although this product contains no acids, caustic or solvent, it cannot be taken internally. Wash hands after prolonged contact with product. For accidental eye contact, flush with water for 15 minutes.

SPECIFICATIONS:

pH	7-8
Specific Gravity	1.008 ± .005
Color	Milky, emulsion
Odor	Pleasant, bouquet
Viscosity	Negligible
Flash Point	NA
